GUNCAST

POOLS AND WELLNESS

Part of KLAFS

50 Years of Excellence

Guncast Pools & Wellness is a business which prides itself on its global reputation for creating luxury, bespoke, swimming pool and wellness projects. Over the past five decades and two generations the company has built this reputation by exceeding expectation to meet the most rigorous standards of quality in design, construction, maintenance, and customer service.

It is due to this, and our creative and bespoke approach to design, that discerning clients have chosen Guncast to create their perfect swimming pools and wellness facilities.

Now part of KLAFS, the world's leading wellness, spa, and sauna manufacturer, we also bring unrivalled luxury and relaxation to our clients with innovative saunas, steam rooms, cooling cabins and more.

Whether it's for the home or commercial facilities, Guncast will bring your vision to life.

Collaborating to Create Exceptional Spaces

At Guncast, partnership is central to the creation of every luxury swimming pool and wellness suite. We work directly with end clients and seamlessly alongside architects and designers, ensuring each project benefits from our experience, craftsmanship, and cohesive, turnkey solutions.

Our approach is built on collaboration. By integrating with wider project teams including architects, designers, developers, contractors, and specialist consultants - we combine expertise, streamline communication, and maximise design and technical potential at every stage of the process.

Our specialist team brings decades of insight across commercial and residential projects. With a focus on end-to-end project delivery, we transform ambitious visions into beautifully engineered, meticulously executed pool and wellness environments tailored to each client's goals.

Water Quality First
Advanced filtration and treatment systems prioritising clarity, hygiene and user comfort.

Technical Excellence
Our team of engineers ensures reliable, efficient and well-integrated systems.

High End Focus
Proven expertise in complex, premium private projects with exacting standards.

SWIMMING POOLS

Residential

The Guncast design team brings world-leading expertise to the creation of luxury swimming pools and spa environments for high-end properties across the UK.

Every pool, whether indoor or integrated into the garden, is designed to harmonise with its surroundings, enhancing the architecture and landscape while delivering an exceptional aesthetic and swimming experience.

Each project begins with a deep understanding of the homeowner's lifestyle and vision. From serene wellness pools within the home to breathtaking garden pools that elevate outdoor living, our designers craft bespoke solutions tailored to the individual.

Safety considerations, especially for families with children or pets, are seamlessly incorporated into the design.

The results are beautifully tailored swimming pool and wellness areas that become an integral feature of the property; functional, luxurious, and finished to the highest standards of craftsmanship.

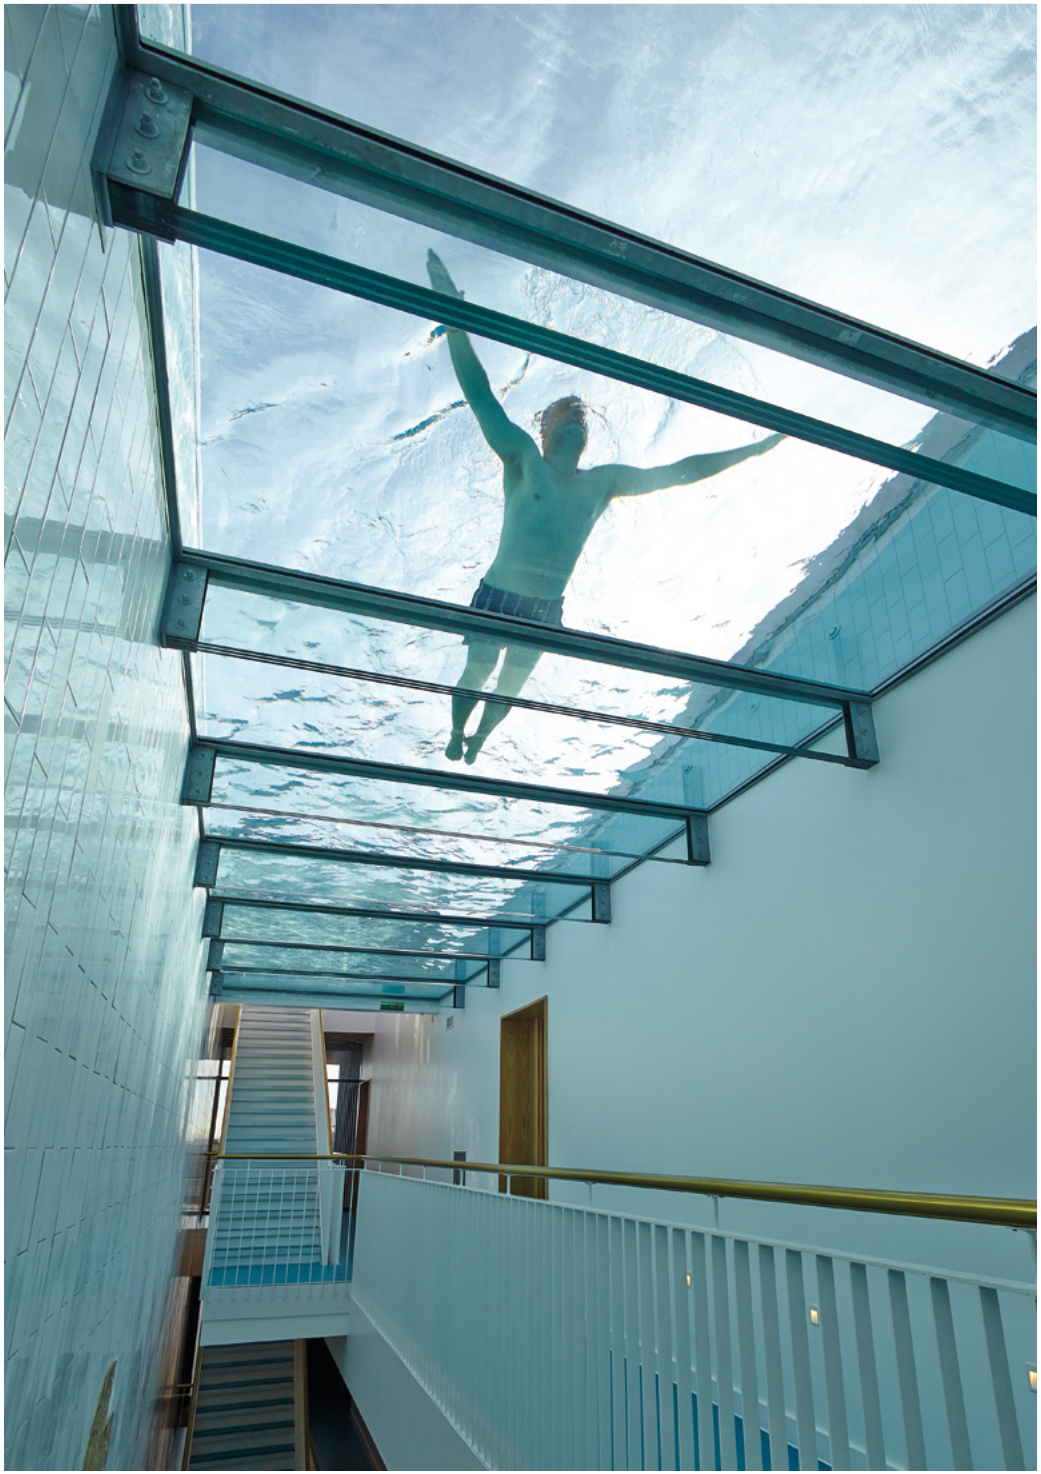

Harmonious Pool Landscapes

We'll create a cohesive and harmonious landscape by designing and building a swimming pool that complements your existing garden and creates a seamless transition between the indoor and outdoor. Our design team are experts in taking a biophilic approach, seeking to create harmony between pool design and nature.

SWIMMING POOLS

Commercial

Guncast's multi award-winning commercial swimming pools are a cut above in every way. Imaginative design, unrivalled durability, attention to detail and over 50 years of craftsmanship expertise come together to create some of the most exciting commercial pools in the UK.

Our projects span a range of sectors, some of which include the oldest prep school in the country (est 1837), luxury residential complexes, and luxury spa and leisure facilities.

Your vision, together with our technical experts, experience and designers' creative expertise, are the perfect combination to create beautiful, functional swimming pools which are finished to perfection.

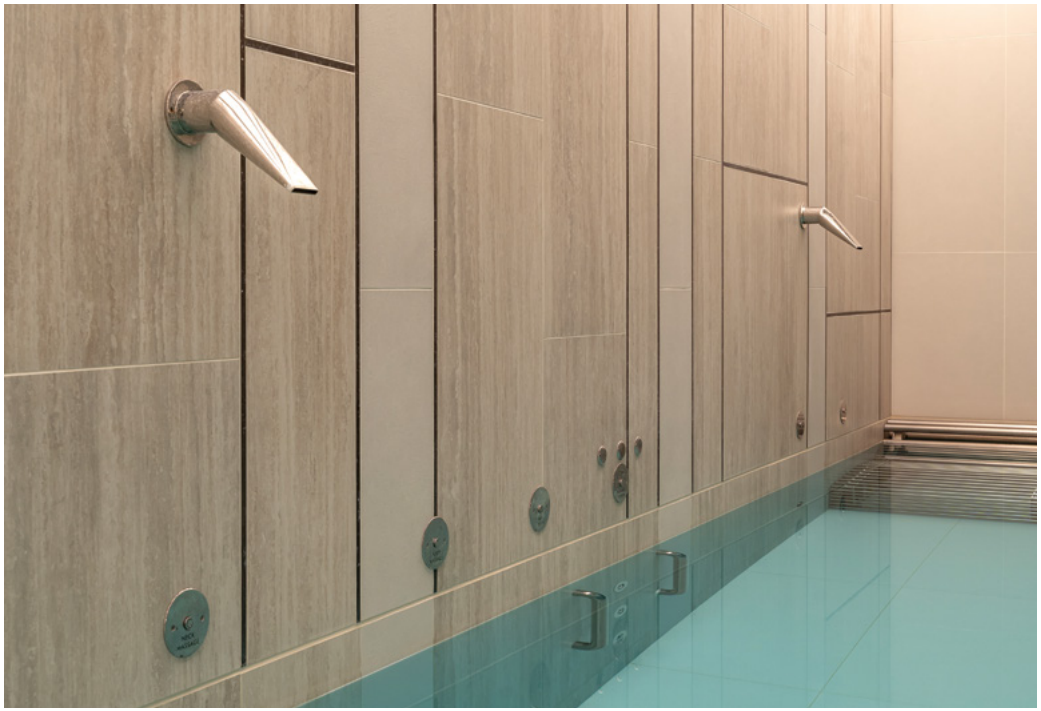

Innovative features such as moving floors, massage jets and clear glass finishes transform the ordinary into the extraordinary.

Together we can achieve something unforgettable.

SWIMMING POOLS

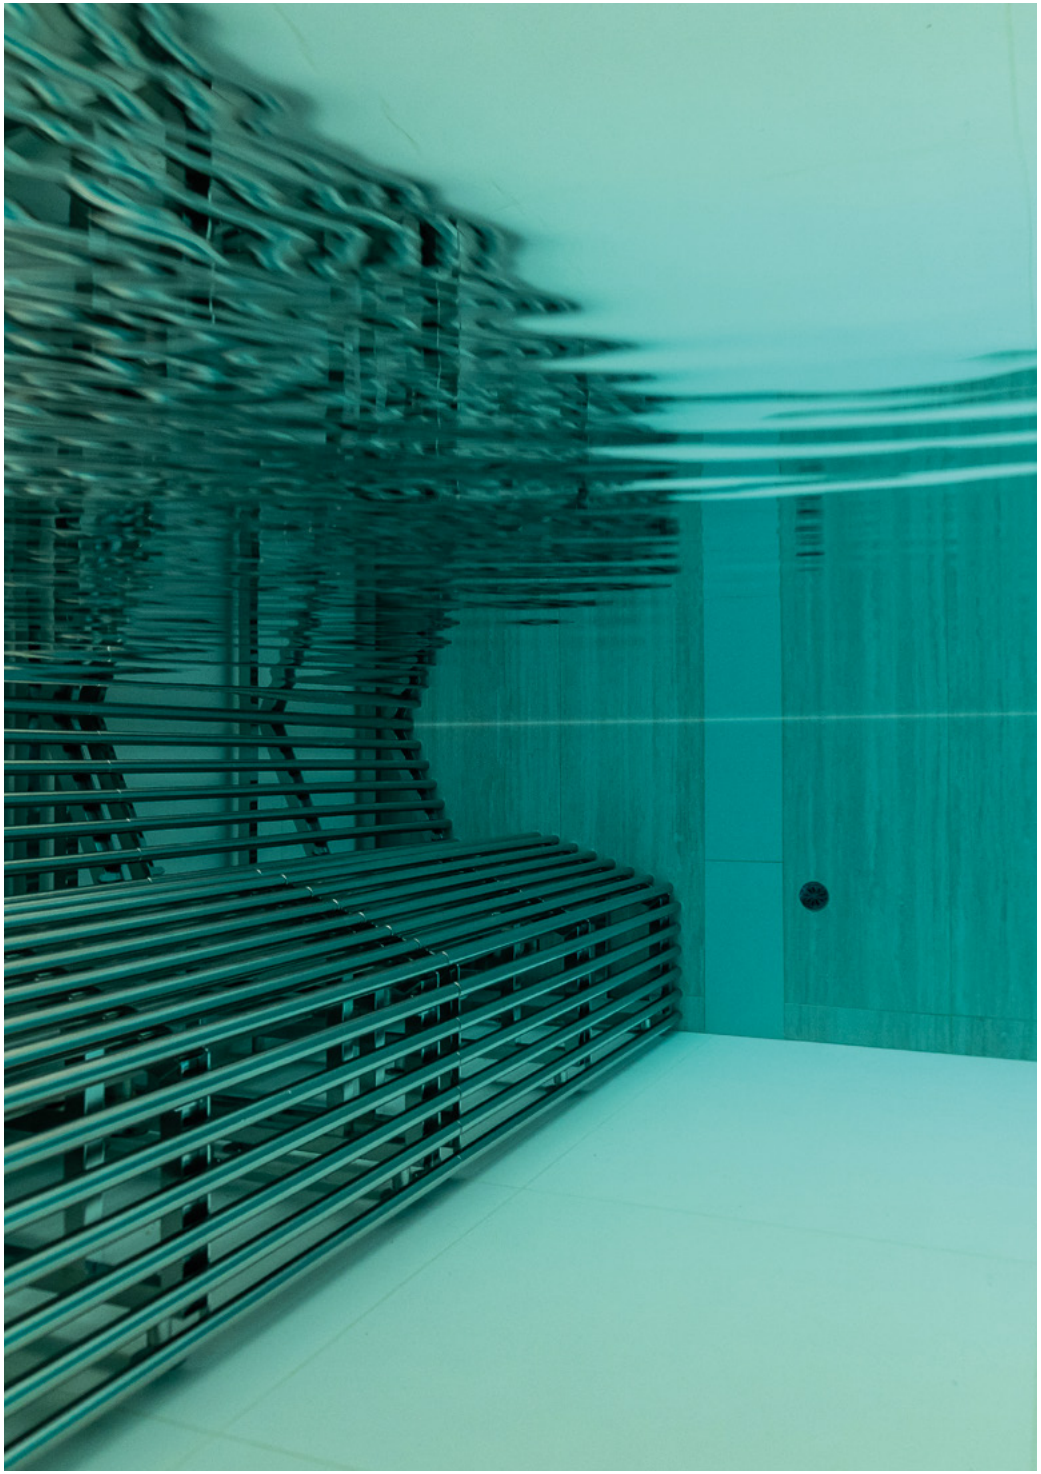

Vitality and Hydrotherapy

Vitality and hydrotherapy pools are designed to deliver therapeutic and health benefits. Using a blend of warm water and targeted massaging jets, these aquatic facilities offer deep relaxation to help you unwind and de-stress. They also provide instant relief for aching muscles, soothe joint pain, and support exercise and rehabilitation.

The experts at Guncast can guide you through every aspect of vitality and hydrotherapy pool design, including the latest accessories. Massage stations, bubble pads, massage benches and powerful swan-neck jets are just a few of the features that can transform your space into a true wellness oasis.

Whether your project is commercial or residential, elevate it to the next level and push the boundaries of relaxation and wellbeing.

LUXURY WELLNESS

Thermal Journey

Guncast pools and wellness are part of KLAFS. Guncast have exclusive access to the beautiful range of award-winning KLAFS products to enhance your pool and relaxation areas.

KLAFS is the world's leading sauna manufacturer and a powerhouse in designing thermal journey experiences, such as saunas, steam rooms, ice lounges, foam steam and infrared solutions, just to name a few. KLAFS pushes the boundaries of wellness experiences, innovating new and exciting products to inspire.

Why not take your swimming pool area to the next level of relaxation and rejuvenation? Adding a sauna or steam room to your pool area is a luxurious addition that can offer numerous health benefits, help you to relax and unwind, and can greatly enhance your overall swimming pool experience.

Guncast has KLAFS trained designers, installation and service engineers who are experts in creating bespoke wellness areas from start to finish that complement your swimming pool area whatever your lifestyle and interior design preferences.

Part of KLAFS

LUXURY WELLNESS

Snow and Ice

Add an invigorating burst of freshness to your wellness ritual. After a sauna or steam bath, effective cooling is not only essential, but also enhances the overall experience. KLAFS offers a range of innovative cooling solutions, from ice fountains and the FRIMAS ice steam room to the ICE LOUNGE and the SNOW PARADISE.

These options, along with traditional cold plunges, provide an exciting and revitalising alternative to conventional cooling methods.

LUXURY WELLNESS

Heat and Steam

KLAFS sauna models are as individual as their owners. With a wide range of innovative designs to fit with any room or lifestyle, there's a sauna design for everyone! Our experts provide bespoke options which allow you to choose between exclusive materials and special features, resulting in a truly unique design solution and offering boundless adaptability.

From elegant stoneware to frosted glazing, enhanced lighting, steam rooms now come with a wide range of design options, so you can create a beautiful space that blends and complements your home, for the ultimate in luxurious rest and relaxation.

LUXURY WELLNESS

Next-Generation Wellness Solutions

KLAFS offers advanced wellness solutions for both domestic and commercial settings, designed to elevate relaxation, recovery and performance.

Infrared warmth, automated infusion comfort with VITALITY BOOST, and Salt Inhalation systems support deep respiratory wellbeing and restorative heat experiences.

Additional options such as LINEA heated loungers, ESPURO foam steam, the Evitarium electric-current water-flow experience, and Sonnenwiese for tanning or collagen regeneration create a fully immersive thermal journey.

Each element is designed to work together seamlessly, forming a cohesive, multi-sensory experience that enhances every stage of the wellness ritual.

Cold plunges and alternative cooling methods complete the cycle, supporting contrast therapy and elevated recovery.

Innovation

As market leaders in the domestic and commercial sectors of the wellness industry, Guncast and KLAFS continually invest in research and development to deliver innovations that prioritise sustainability and responsible practice.

Heating pools and saunas require significant energy, so we focus on high-efficiency equipment and smart solutions such as automated covers, advanced lighting, and energy-saving steam technology. These reduce consumption without compromising the guest experience.

Water is another valuable resource, which is why we use modern treatment systems like OSPA and Daisy system. These keep pool water exceptionally clean with fewer chemicals, even under winter covers, reducing the need for water changes and limiting overall chemical use.

To meet the challenge of using natural resources responsibly, KLAFS has developed intelligent sauna and steam room systems that cut energy use by more than 40 percent while maintaining the same level of comfort and luxury.

Together, these innovations reinforce our commitment to creating luxurious wellness environments that are efficient, sustainable, and built for the future.

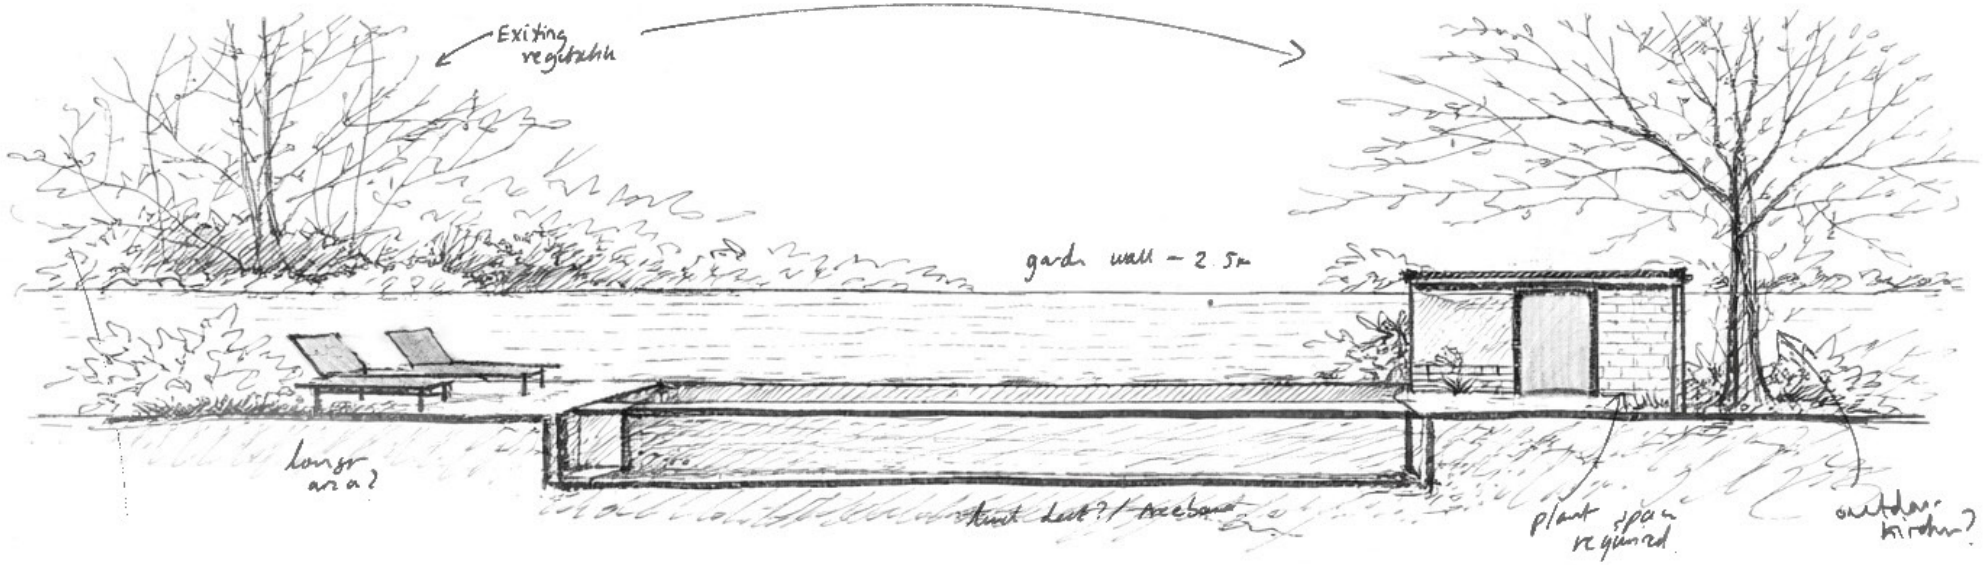

Architect Zone

For over 50 years, Guncast has worked alongside leading architects, designers, developers and quantity surveyors, so we understand the importance of partnership when creating luxury swimming pools and wellness suites.

We have developed this specialist online area to support existing and new partnerships. By providing information that we believe is valuable to you, we hope to offer you inspiration, helping you through the pitching, designing and the building elements of your projects, ensuring continued excellence.

Access to this site is by invitation only, with an aim to provide our select community of architects with a valuable resource to enhance luxury pool build projects.

MAINTENANCE

Aftercare

To keep your swimming pool, spa, and thermal cabins operating efficiently and effectively we recommend regular service and maintenance throughout the year. Our expert swimming pool service engineers and KLAFS dedicated engineers provide an excellent standard of complete pool and wellness facility servicing, as well as bookable and emergency appointments should you need us.

The Guncast and KLAFS service team provides a fully insured diving team to carry out any required maintenance, refurbishment, and other underwater or confined space operations that require qualified and experienced specialists. This could mean maintenance can be carried out without the need to drain your pool, saving time and water consumption.
